

Real-time Virus Sterilizer Air Medi

Certificated product to sterilize COVID19 by
99.99% within 30 second

Test institution: Laboratory specializing in virus inactivation, KR Biotech

CAS Air Medi
D5

☑ Removing odor and sterilizing virus by 99.9%

☑ Periodic preventive measure every 30 second

☑ Harmless to human with natural ingredient

☑ Easy to install with the practical design

Have you checked COVID19 preventative measure?

Q1 Is it **effective sterilizing** COVID-19 virus?

YES NO

Q2 Is your space sterilized in **real-time**?

YES NO

Q3 Is the preventive **material harmless**?

YES NO

Preventative measure of CAS Air Medi

A1. **YES.** CAS Air Medi is certificated for the efficiency of sterilizing COVID19

A2. **YES.** CAS Air Medi sterilizes the virus at least 30 second to a maximum 300-seconds cycle in real-time.

A3. **YES.** It is harmless because is consist of Phytoncide derived from nature and alcohol ingredient. (Obtained certification for oral toxicity, skin irritation stability)

Normal preventive measure

A1. **NO.** Most of COVID19 sterilizers are not certified.

A2. **NO.** Periodic preventive measure is possible but real-time measure is difficult.

A3. **NO.** Wearing protective clothing, ventilation is inevitable because preventive materials are chemical.

Don't worry!

Your space is sterilized with

CAS Air Medi

every 30 seconds in real-time

CAS AIR-MEID D5 spreads phytoncide liquid through the ultrafine spray and sterilizes virus

Strong sterilization
Sterilize pathogenic bacterium such as COVID-19, swine flue, etc

Strong sterilization effect
Neutralization for toxic material and odor in house and office.

Vegetable ingredient
Vegetable ingredient derived from 120 sorts of natural plant (No toxicity and side effect)

Stress relaxation
Phytoncide is useful for reduction of hormone(Cortisol), fatigue recovery, and strengthening immunity

No addition of noxious material
Obtained test report for skin irritation No addition 10 representative noxious material

Available to set the quantity of spray
The user can set the quantity of spray according to the environment, which allows maintaining a quarantine system.

CHECK POINT

1. Sterilizing COVID-19 by 99.99% (Antibacterial)

- Certified for sterilizing the COVID-19 within 30seconds (Certificated by KR Biotech)
- Certified for sterilizing Pneumococcus, swine flu virus by 99.98%, and influenza by 99%

2. Removing odor by 99.9% (deodorization)

- Ammonia 30minutes 99exceed certification (Korea Apparel Testing Institute)
- Certification for Household chemical product (deodorant) (Korea Apparel Testing Institute)

3. Harmless with naturally derived ingredient

- Phytoncides liquid derived from nature (Stress and active oxygen reduction, improved immunity)
- Obtained a a oral toxicity test report (Korea Harmonization Test Researcher)
- Test for skin irritation stability and certificated for daily chemical products (sterilizers) (Korea Medical Testing Institute)
- Obtained a certificate to safety standards (Korea Environmental Industry & Technology Institute)

Certification

Certification for the efficiency of sterilizing COVID-19 by 99.99% within 30 seconds

Certification for the efficiency of sterilizing swine flu by 99.98% within 30 seconds

Certification for the efficiency of sterilizing pneumococcus by 99.9% within 30 seconds

Acute oral toxicity test pass report

Skin irritation stability test report

Certificate of conforming to safety standards

Verification report for safety standard and daily chemical products

Use environment

| At home

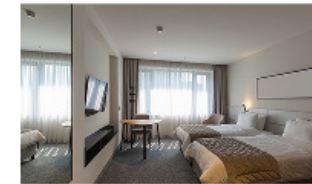

Indoor space (living room/ bed room)

In car

| In a sealed public room that is difficult to ventilate.
